

"We have built Octaform aquaculture tanks in several of the farms that have recently been constructed and we are very happy with the performance. The resulting tank fields have a clean and professional appearance. The Octaform Finished Forming System is becoming the system of choice for our larger tank projects."

Sean Wilton  
Aquaculture Consultant, Nanaimo, BC Canada

The leader...

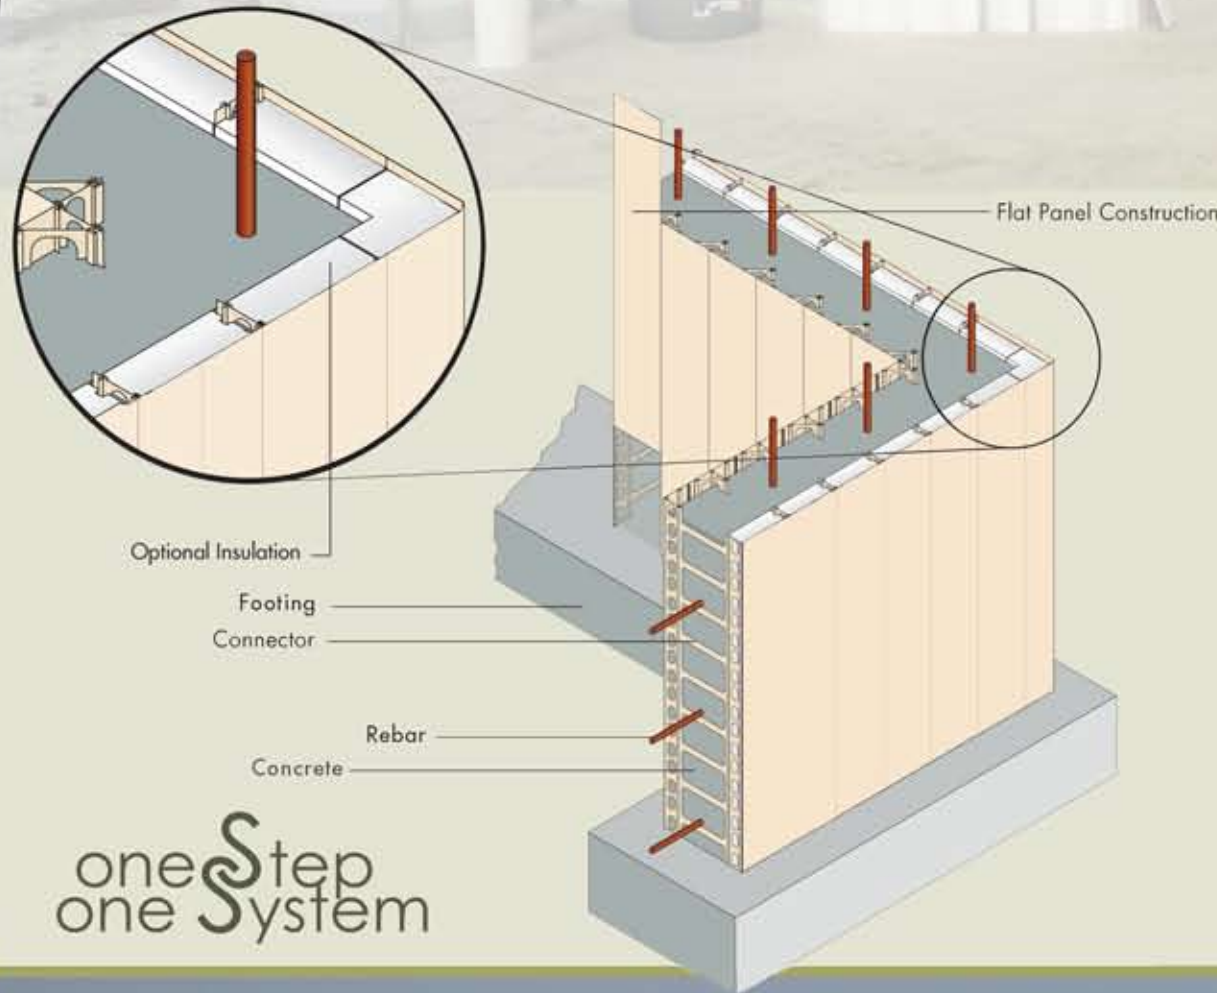

Octaform Finished Forming Systems provide unparalleled design and engineering flexibility that surpasses that of any other forming system. What makes the Octaform system unique is that it is a concrete wall and finished wall surface, constructed in one step, one system. No sealing or finishing required.

- Unlimited design flexibility
- Reduced maintenance costs
- Reduced energy costs through energy efficiency
- One step, one system - increased durability
- Reduced shipping costs
- Easy to clean
- NSF potable water approved
- Shortened construction schedule

Octaform Finished Forming Systems are ideal for the construction of any type of tank, be that water, manure, waste water, fire suppression or biodigestation.

We recommend the Octaform Finished Forming System with Original Finished Panels for aquaculture tank construction. For more information on our Finished Panel options visit [www.octaform.com](http://www.octaform.com)

## Why Octaform?

- A protective long lasting finish**
- An Octaform tank wall is completely finished in one step, one system
  - No added coatings or finishes
  - No additional trades required
- Adaptable design**
- Build tanks of almost any degree or radius
  - Create sumps and side boxes
  - Mount equipment within wall pre-pour or attach to finished wall
- Durability**
- Finished Wall Panels protect concrete from chemicals, mold and mildew
- An installation friendly system**
- Octaform components slide together quickly and easily
  - No special tools or skills required
  - Rebar can be tied and inspected easily prior to concrete placement
- Cost effective shipping**
- Flat-stacking components minimize 'shipping of air' for cost effective worldwide transportation

"AquaOptima has chosen to use Octaform in our system due to its smooth inside surface, easy maintenance and long lasting material. It is easy to install and has a cost advantage for medium and large tanks."

Idar Schei  
Managing Director, AquaOptima, Norway
