Superior finish and reliability

complete finish

for your precast and tilt-up walls

Introducing...

A durable easy to clean finish that integrates seamlessly into pre-cast and tilt-up walls.

one Step
one System

Octaform Finished Linings are designed to provide a finished insulated or uninsulated, protective lining on one or more sides of tilt-up and pre-cast concrete walls.

- The reliable and durable finish
- The easy-to-clean, sanitary, wall surface reduces maintenance costs
- The highly light-reflective wall finish, reduces indoor and outdoor lighting requirements and increases energy savings
- The durable protective finish provides substantial moisture mold and mildew resistance over porous concrete walls
- Flat-stacking components are easy to store and handle, reducing transportation costs
- Specify Octaform Original or Octaform SNAPLockTight panels as your wall finish lining on your next project.
- Octaform SNAPLockTight panels are your NSF certified, biosafe, foodgrade solution.

Octaform Finished Linings are available in three standard colours: white, grey and beige. Custom colors can also be specified.
