

AGRICULTURAL FACILITIES

Permanent Stay-in-place PVC formwork+liner system.

Enables rapid delivery of large-scale projects and offers owners a permanent, corrosion-resistant liner.

PROJECT DELIVERY WITH CERTAINTY

A COMPLETE FORMING SYSTEM
FOR AGRICULTURAL FACILITIES

- SMOOTH, CLEANABLE PVC SURFACE
- BUILT FOR FREQUENT CLEANING
- BRIGHT FINISHED INTERIOR
- DURABLE IN DEMANDING CONDITIONS
- CONFIGURED FOR AGRICULTURE

LIVESTOCK HYGIENE

CLEANABLE SURFACES FOR LIVESTOCK ENVIRONMENTS.

**01****SMOOTH PVC SURFACE**

A cleanable surface for areas exposed to moisture, manure and regular wash down.

02**BUILT FOR FREQUENT CLEANING**

PVC resists moisture and is compatible with demanding cleaning environments.

03**BRIGHT FINISHED INTERIOR**

A white finished surface supports visibility during routine inspection and cleaning.

SANITATION

Octaform PVC meets CFIA sanitation standards for construction materials used in food-related environments.

DAILY OPERATIONS

BUILT TO PROTECT YOUR SCHEDULE.

On site in as little as three months

Formwork arrives fast, then keeps meeting or beating schedule needs for the rest of the build.

● CUTS LONG-LEAD WAITS

One supplier, start to finish

Scaffolding, forms, insulation, cladding and interior liner from a single subcontractor, with full schedule control.

● CUTS TRADE HANDOFFS

No form stripping or resetting

Stay-in-place formwork eliminates the need to strip and reset temporary forms, helping crews maintain progress during wall construction.

● CUTS FORM STRIP & RESET CYCLES

Finished when formed

Insulation, cladding and liner are done the moment the wall is poured. No follow-on finishing.

● CUTS SEPARATE FINISH TRADES

Crews keep moving

A repeatable installation sequence helps crews move efficiently from one tank to the next.

Octaform works with your construction partner.

● HELPS REDUCE CREW DOWNTIME

SCHEDULE SAVED

On large-scale projects, schedule savings have been measured in months.

CUSTOMIZED TO MEET SPECIFICATIONS IMPROVED HYGIENE & WASHABILITY
