

OUR TEAM IS YOUR TEAM

Octaform support extends well beyond supplying the system. Our team provides structural engineering and technical design support, detailed confirmation drawings, and, for larger projects, in-house estimating and project scheduling assistance.

We also provide bill of quantities guidance, referenced time studies, and schedule optimization recommendations to help reduce labor requirements and overall project duration.

AT YOUR SIDE ALWAYS!

Explore the latest Octaform projects, technical insights, and company updates at octaform.com and across our social channels [@octaform](https://twitter.com/octaform).
